INTERNATIONAL CONFERENCE ON TECHNOLOGICAL AND SOCIAL INNOVATIONS (ICTSI) 2018

Sept. 12-14, 2018, Parklane International Hotel, Cebu City

Messages

My warmest felicitations to the organizers of this year's ICTSI 2018 for bringing this conference to the beautiful island of Cebu---home of the hospitable and loving people of splendid destination in the east! Welcome all and congratulations also to participating researchers, innovators and inventors in this once-in-a-lifetime forum of intellectuals.

The International Conference of Technological and Social Innovations 2018 is another avenue of upscale technology breakthroughs, prompted by technology revolution which happens every day.

According to the recent McKinsey study, a dozen technologies, including genomics, energy storage, and automation will drive major economic and societal transformations in the next couple of years. The implication of these changes is for us to embrace the tech-driven economy. The academe, most importantly, must play a major role in catalyzing economic growth, as educators are responsible to lay the ground work for students to appropriately act upon the emerging disruptive technologies in the workplace.

This year's conference of multi-disciplinary researches in technology and social sciences is a convergence of great minds who are ambassadors of social change. At the intersection of these disciplines is the tool of the future---the impetus for a more stellar discovery. Thus, we continue the quest for a better life!

Congratulations!

EDGAR U. TIBAY, PME, Ph.D.

University Vice President

Production, Extension and Business Affairs
